Senior QA Engineer with over 10 years of experience in quality assurance, I have developed a strong ability to lead teams, optimize testing processes, and ensure the highest software quality standards.

My background in manual testing, test planning, defect management, and team coordination has allowed me to contribute to the success of multiple projects across different industries.

Currently, I lead and support QA teams to meet planned deadlines while mentoring team members and improving testing strategies. My experience includes defining and analyzing test plans, monitoring execution, generating reports, and coordinating support during deployments.

Additionally, I have worked closely with cross-functional teams to enhance QA practices and ensure seamless collaboration between development, business, and testing teams.

I take a proactive approach to problem-solving and continuously seek ways to refine testing methodologies, making processes more efficient and effective. I am eager to bring this mindset and contribute to delivering high-quality software solutions.

I would welcome the opportunity to discuss how my skills and experience align with this role. Thank you for your time and consideration. I look forward to your response.

Best regards

Iván Nicolás Guerrero
